PROFILE

Computer Science and Engineering student at American International University-Bangladesh (AIUB) with interests in Software Engineering, Python, Data Structures & Algorithms, Artificial Intelligence, and problem solving. Seeking a software engineering internship to apply programming and software development skills in real-world engineering work.

EDUCATION

American International University-Bangladesh (AIUB)

B.Sc. in Computer Science & Engineering (CSE)

Current Semester: 8th Semester | Expected Graduation: 2027

TECHNICAL SKILLS

Programming: Python (Basic), C++, JavaScript, PHP

Software Engineering: Object-Oriented Programming (OOP), Data Structures & Algorithms

Web: HTML, CSS, JavaScript

Database: MySQL

Tools: Git & GitHub, Arduino

ACADEMIC PROJECTS

AI-Powered Code Review & Bug Detection

- Academic project focused on software quality, automated code review, and bug detection using AI-oriented approaches.

Student Development System

- Academic project focused on student development and management.

Super Shop Management System

- Academic project focused on shop and management operations.

Arduino-Based Lie Detector System

- Arduino-based academic hardware project exploring physiological-signal-based detection.

AREAS OF INTEREST

Software Engineering • Backend Development • Python • Data Structures & Algorithms • Artificial Intelligence

LANGUAGES

Bengali (Native), English (Professional Working Proficiency)
